

MAT-011 INCLINED MAT TROLLEY

This Mat Trolley is designed for the storage and transportation of **RIGID**-type gymnastic mats only, and not for any other purpose.

It must **NOT** be used to transport any other items, and must **NOT** be ridden or stood upon.

It is to be used by **ADULTS ONLY**, who are familiar with its use, and with any risks associated with this type of equipment.

Do **NOT** lift the retaining bar if this mat trolley is standing against a wall, as it will not then be possible to swing the bar to a safe position behind the trolley.

Do **NOT** allow any child or unsupervised person to be in the way when the retaining bar is being lifted or lowered.

Do **NOT** allow fingers or any other part of the body to be trapped between the retaining bar and the trolley frame.

To load and use this trolley safely:

- Firstly ensure that both wheel brakes are applied.
- Using one person at each end, swing the retaining bar/handle completely over the back of the trolley until it is at rest, taking care that fingers cannot be trapped by the moving bar, and that no one can be hit by it.
- Using one person at each end, load the mats vertically onto the footplate of the trolley, stacking them neatly against the backboard. (Do not exceed the maximum load of 12 x 25mm thick mats, or allow the mats to protrude over the front edge of the footplate.)
- When loaded, using one person at each end swing the retaining bar over to the front of the trolley, so that the bar rests against the stacked mats. Again, take care that fingers cannot be trapped, and that no one can be hit by the moving bar.
- To move the trolley, release both wheel brakes, and push or pull the trolley, with one person at each end to guide it.
